> “...increasingly capable AI models are being used to identify potential vulnerabilities in open-source code, significantly increasing the volume and pace of security reports.

CORE LIGHTNING · V26.06.7 RELEASE NOTES · 28 AUG 2026

2 Oct **Attackers target unpatched Core Lightning nodes.**

Bugs get fixed in days. Operators hear late.

01

Warnings arrive late, from X

02

“Am I affected?” is hard

03

The right action changes

Firewatch

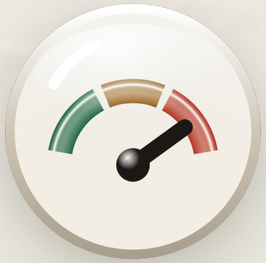

Dependabot for Lightning nodes, built to be trusted.

Affected

Can’t tell

Not affected

Never green when unsure.

Live demo

Why trust it

Read-only credentials

Developers’ words, audited

Build check: the version can’t lie

Encrypted, power-cut-proof alerts

Next: an open advisory format, proposed upstream.

Built for the node operators Kaduna is training.
